Level up

Audi connect  
plug and play

# A smart connection

The Audi connect  
plug and play app

The Audi connect plug and play app (iOS/Android) lets your smartphone use Bluetooth and the Audi DataPlug to connect to your vehicle, turning it into a connected car in no time at all. The solution can be retrofitted to many 2008 and later models\*. The next few pages will show you the benefits of always having all key information about your Audi at your fingertips.

\* The compatibility check for your vehicle is available on the Audi connect plug and play website.

**You can download the Audi connect  
plug and play app here.**

# **A better overview in no time**

With the latest  
vehicle information  
about your Audi

**My Audi.** Welcome. With the Audi connect plug and play app, you can access the latest information about your vehicle at any time.

In the “My Audi” section, you can view information such as mileage, chassis number and fuel level. You can even check how many kilometres and days are left until your next service appointment. This way, your next service is always at your fingertips.

# More time for what's important

With the digital  
logbook for your  
business and  
private trips

**Trips.** The digital logbook gives you the means to bring transparency to how you document and categorise your business and private trips. The automatic log function makes it easy to record details such as starting point and destination, date and time of day, journey time and route, and export them via the app as required.

# More control over your costs

The refuelling and  
charging monitor on  
your smartphone gives  
you a complete overview

**Fuel monitor.** The fuel monitor gives you an overview of your refuelling processes and monthly fuel expenses. Whenever the Audi DataPlug registers a refuelling process, you receive an app notification that the fuel costs have been logged. The service\* automatically records when, where and how much you refuel.

\* minimum refuelling level of 10 l

**Charging monitor.** The charging monitor provides an overview of your charging expenses, how many kilometres you've driven and the charging status of your Audi. The app automatically registers when you charge your vehicle and stores the address of the charging station. You are then asked to enter your expenses. Useful feature: When the charge level is getting low, you will receive a reminder to recharge in good time.

\* Only available for the Audi e-tron

# Greater efficiency on daily routes

With custom driving style analysis for your statistics

**Statistics.** Audi connect plug and play helps you optimise your driving style.

Personal driving data, such as acceleration, vehicle speed, engine speed and braking behaviour, is measured and displayed in a detailed statistical breakdown.

This lets you learn from your own driving style and reach your destinations more efficiently.

**More space  
for tailored  
service**

With direct requests  
for your inspection  
appointments

**Service appointments.** With the Audi connect plug and play app, you can request an appointment at your Audi partner at any time. Including placing a direct call and with navigation assistance.

If your vehicle needs an inspection or an oil service, you have the option of automatically requesting a service appointment at your preferred Audi partner. Your Audi partner will then contact you as soon as possible and you can opt to provide them with relevant vehicle information.

# More fun on the move

Always with new  
challenges on a  
journey of discovery

**My challenges.** Take fun at the wheel to the next level and discover selected nearby attractions. By adopting an efficient driving style, taking local discovery tours, visiting your Audi partner or regularly using the app, you can collect points and trophies.

It's a great way to challenge your driving performance again and again in different categories and earn rewards from your Audi partner\*. Level after level after level.

\* Only from participating Audi partners

# More safety on every trip

With reliable roadside assistance for your journey

**Breakdown and assistance.** Fast assistance wherever you are should you have a breakdown or accident.

Because the app's "Breakdown and assistance" function connects you with national 24-hour roadside assistance or with the Audi service hotline\*. You have the option of transmitting your location and vehicle information as well as calling up important tips for what to do in an emergency.

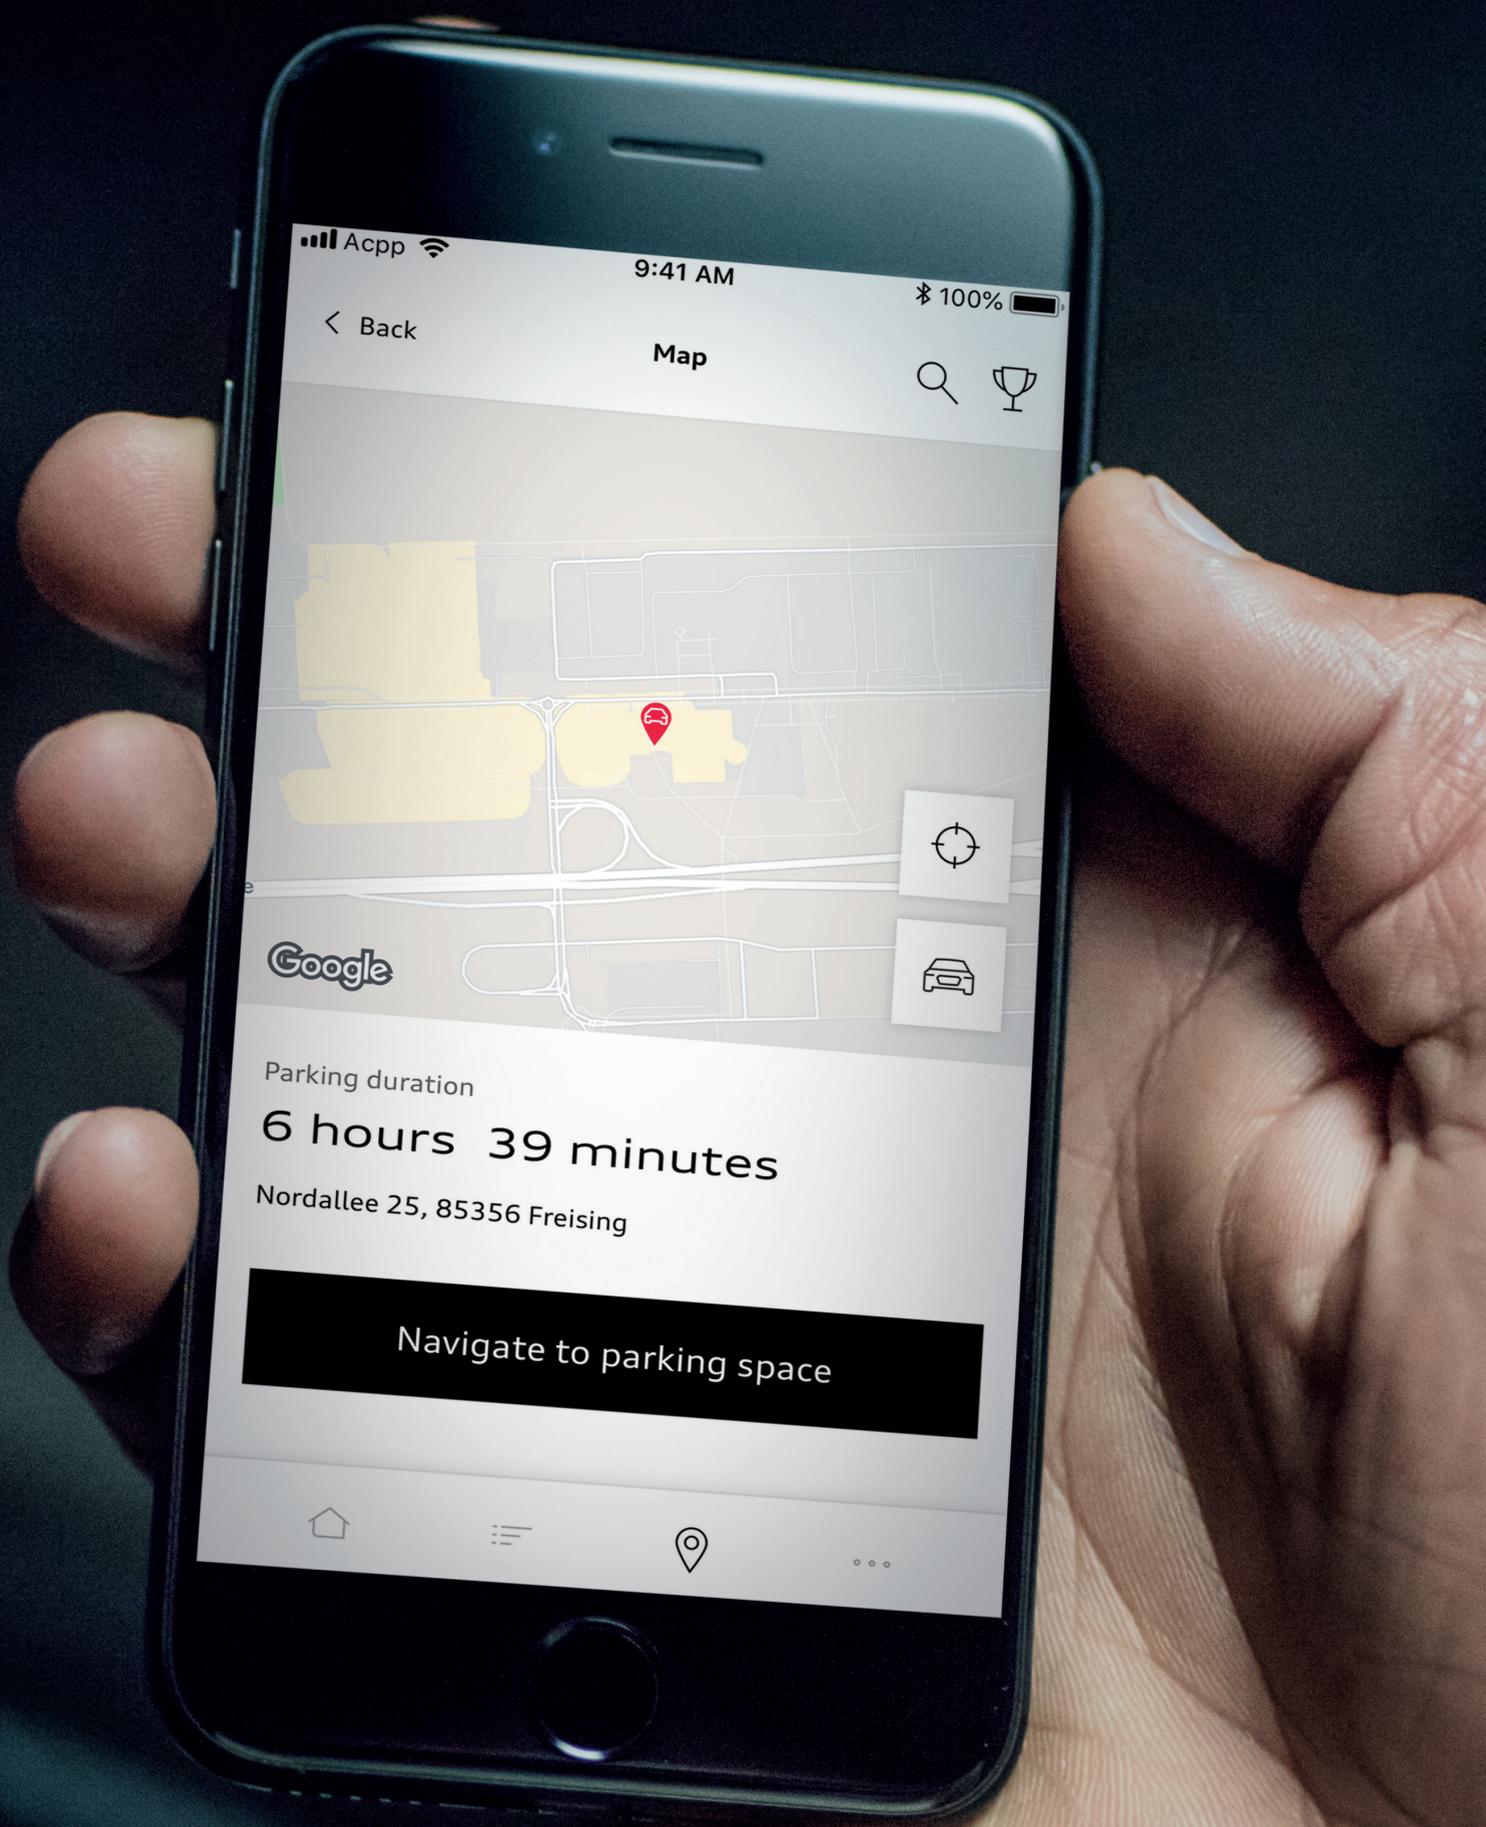

\* Costs are calculated according to the relevant tariff from your provider. Roaming charges may be incurred when calling from abroad.

In addition, the app displays a selection of your vehicle's warning and control lights. Supplementary explanations help you identify these correctly and respond appropriately should a control light be activated. This is what safety feels like.

# More connected to your car

With navigation  
to your parking  
location

**Parking space.** With Audi connect plug and play, you always know precisely where you last parked your vehicle. Allow the app to conveniently guide you to your car – or share the GPS coordinates, for example with your friends. You can even keep an eye on how long you've been parked.

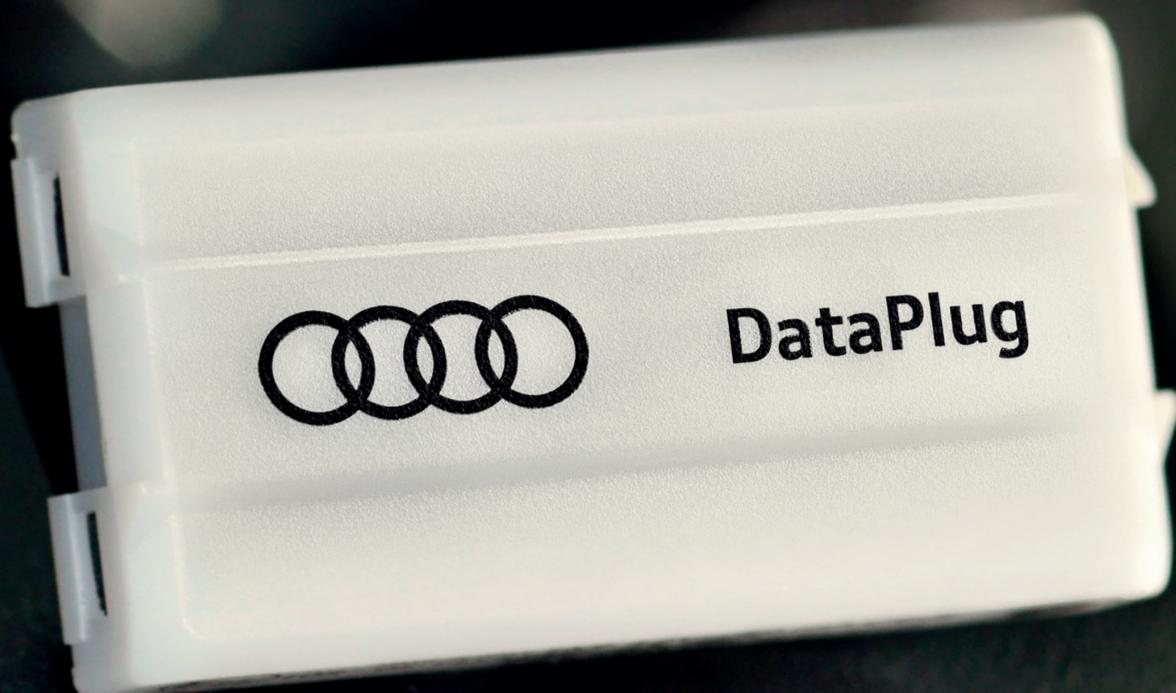

A woman with short, wavy blonde hair is shown in profile, looking upwards and to the right. She is wearing a light-colored, textured sweater. The background is a deep blue sky with a bright, glowing sun or light source in the upper right corner, creating a soft, ethereal atmosphere. The text is overlaid on the lower half of the image.

# Connecting what's important to you

The Audi DataPlug  
in conjunction with  
the Audi connect  
plug and play app

Thanks to Audi connect plug and play, many Audi models released in or after 2008 can become connected cars, capable of sending information to your smartphone via Bluetooth. No complicated installation necessary. The required Audi DataPlug can be obtained from your Audi partner and is then connected to your vehicle's diagnostics interface. A minor procedure for a major plus in mobility and safety.

## Your benefits:

- > free app with simple and intuitive operation
- > connected on the move with key vehicle information
- > increased safety in an emergency with reliable roadside assistance\*
- > complete control thanks to smart tools and a digital logbook
- > direct contact with your Audi partner to request an appointment

\*Costs are calculated according to the relevant tariff from your mobile services provider. Roaming charges may be incurred when calling from abroad.
